Gilead wanted to rethink how a global healthcare brand could show up in culture. The goal was to move from corporate messaging to genuine community impact, with a focus on visibility and equity for underrepresented groups in health and wellness.

THE WORK

We built the creative foundation for Gilead's Community Health Equity Initiative. Our team developed the identity system, the creative guidelines, the campaign language, and the programs that carried the work into real spaces. The message came to life through Juneteenth Block Party, Pride Festival, Essence Festival, and Mary J. Blige's Strength of a Woman Summit, turning strategy into lived experience.

Next Project

THE IMPACT

What began as a consulting assignment grew into a cultural movement. The work sparked national conversations about equity in health and positioned Gilead as a leading voice for inclusion. It also created a blueprint for purpose-driven storytelling across the industry.
